

Shipping Information

1. For all new programs, lead time is approximately three weeks or sooner. Of course once estimated monthly volumes are established after award of bid, Belco will build that into the production schedule in time to meet delivery requirements to ensure stock on hand. Railcar orders are always subject to a three week lead time.
2. Will call orders are not subject to any minimums.

For distribution partners, truckload orders are required to be full trucks with approximately 18-21 units. Railcar orders are required to be full cars with approximately 80 units.

3. For distribution partners, delivery days are approximately once a week. This would be dependent on time product is ordered and transit time from the manufacturing facility. For local dealer facilities that may be serviced directly by Belco two deliveries per week are offered.

Package Sizes and Counts

ArmorCoat XT Trim

1" Trim	Unit-Mini-Micro counts	5/4" Trim	Unit-Mini-Micro counts	2" Trim	Unit-Mini-Micro counts	XT POST	Unit counts
1x2	640-320-160	5/4X3	288-144-72	2X2	320-160-NA	4x4	98

1x12	80-40-20			2X12	40-20-12		

Package Characteristics

At the halfway mark of every unit, we put lath for easier separation. We weatherproof wrap all material, apply dunnage and band with at least two metal bands. The top row of every unit is stacked face down to avoid any damage during movement and storage. For 1x2 and 2x2 products, we sub bundle units in 20 piece packs using shrink wrap. All units are marked with a printed placard, adhered right to the packaging for easy identification.
