

## Primer Acrylic Resin Test Results and Conclusions

The new, acrylic resin in the primer for XT and Olympic products truly sets the standard in quality for the building material industry.

### 1. Greatly Improved Block Resistance

- You will never have to worry about painted wood sticking to itself if you follow best practices for storing and handling our products in the yard.

### 2. Extended Heat Age Stability

- The XT Trim Finish System will protect your products from high temperatures and the passage of time.

### 3. Extended Roller Stability

- Roller stability reduces waste during our manufacturing process, so that we can lower your costs.

### 4. Greater Low Temperature Film Formation

- Low temperature film formation means that will have a good-looking finish even when its cold.

### 5. Excellent De-aeration Upon Spray Application

- Excellent de-aeration prevents paint bubbles.

**FINISH RIGHT**

ABOUT BELCO FOREST PRODUCTS — In business since 1978, the company operates three manufacturing plants on 16 acres in Shelton, Washington. Belco produces a variety of exterior wood products including the best-selling XT brand, a line of premium treated trim for residential and commercial applications.
